Becky,

We just now got to sit down and start looking through this data.
Can we set up a call say on Tuesday afternoon to discuss a little further?
If another day/time works better, we will do our best to accommodate.

Thanks,
Keith

We scheduled an internal discussion at 2pm, can we have phone call with you about 230 or 3? Will your Director want to participate in that? If so I need to let Jac know.

Subject: SESD Laboratory Results for the North Georgia Surface Water PFC Study, SESD ID. 16-0451

Becky -

Attached are SESD's final laboratory results for the PFC analyses of surface water samples collected by Georgia EPD from 6/19/16 to 6/24/16 as part of the North Georgia Surface Water PFC Study. Many of the samples exceeded EPA's drinking water combined health advisory for PFOA and PFOS of 70 ng/L. The highest PFOS concentration was 2,300 ng/L. Please distribute the laboratory results to all impacted parties as appropriate.

Thanks, Mike Neill
